

ALFRIE S. VALLE

Data Scientist | Advanced Analytics & Automation Specialist
Blk 20 Lot 23 Ph2 San Agustin 1 Solar Homes, Dasmariñas, Cavite, Philippines
Email: vallealfrie@gmail.com | Mobile: 09073574769 |

OBJECTIVE

I have 10 years' experience as a Data Analyst and Full-Stack Developer specializing in Finance and Medical Data Systems. I'm an innovative Data Analyst and Full Stack Developer who builds secure and scalable Hospital Management and Data Visualization platforms through the integration of AI-assisted development and automated workflows.

CORE COMPETENCIES

- **Data Science & Analytics:** Relational Data Modelling, ETL/ELT Pipelines, Statistical Analysis, Trend Forecasting, Data Hygiene, and Auditing.
- **Technical Stack:** SQL (PostgreSQL), Python, Supabase Cloud Database, Tailwind CSS, JavaScript, Advanced Excel (VBA, Power Query, Macros).
- **Business Intelligence (BI):** Interactive Dashboard Design, KPIs with Executive Scorecards, Looker Studio, Power BI, Interface UI/UX Design.
- **Domain Knowledge:** Healthcare ERP/EMR - BizBox, Financial Ledger Reconciliation, Data Privacy - NPC DPA 2012, CRM Data Integration.

INTERACTIVE DEMO DASHBOARDS

- **Sales Force Intelligence & Analytics Platform** | <https://vallealfrie-png.github.io/salesforce/>

Built an interactive sales performance system featuring dynamic time-slicing, target-versus-actual progress tracking, and automated revenue breakdowns across key territories and product streams.

- **Project Management & Operational Delivery Matrix** | <https://vallealfrie-png.github.io/projectmanagement/>

Engineered a high-level operational tracking portal to monitor project delivery lifecycles, resource utilization, task completion velocity, and bottleneck risk indicators.

PROFESSIONAL EXPERIENCE

Perpetual Help Medical Center (PHMC) | *Data Analyst / Full-Stack Developer*

July 26, 2022 – Present

- Transformed Healthcare ERP Data from static files by extracting, cleaning, and modelling highly unstructured transactional data from Hospital Management Enterprise (core BizBox), eliminating systemic errors and duplicated ledger entries.
- Delivered significant insight through analysis of Metro Manila Consumer Demographic Data and Hospital Visitors Trends, converting potentially complex database metrics into high-level visual reports for Hospital Administrators.
- Utilized AI to bypass API row limitations by recursive fetching to ensure that medical master data remained 100% synchronized.
- Used AI for advanced data mining and cost analysis to improve pricing of products and services.
- Created automated databases and dashboards that provide the organization with data used to make its business decisions.

Veterans Bank | *Accounting Personnel*

Feb 2013 – Dec 31, 2020

- Responsible for the accounting reconciliation of outward/inward checks and monitoring/checking transactions with other teams to coordinate with banks in rectifying ledger entries.
- Worked with teams on complicated problems as well as with branches in responding to inquiries.
- Developed a thorough understanding of the clearing process as well as the processes and protocols involved with it.

Profriends | *Loan Processor*

Sept 2011 – Sept 2012

- Assisted in processing up to 300 loan applications and worked diligently to meet all deadlines while maintaining electronic data to protect privacy.
- Provided assistance to administrative staff and coordinated the input of information in the Loan Organization System.

EDUCATION

- **Universidad de Manila (2007–2011):** BSBA (Bachelor of Science in Business Administration) Major in Marketing.
- **S.T.I. (2001–2003):** Diploma in Computer Electronic Technology.

SEMINARS ATTENDED

- DigiTech: Mastering Your Tech (*June 15, 2022*)
- Home Credit: RealiTea Talk (*March 18, 2022*)
- Veterans Bank: Signature vs. Forgery Detection (*March 1, 2014*)

PERSONAL DETAILS

- **Date of Birth:** 12/31/1982 (Age: 43)
- **Nationality:** Philippine | **Religion:** Catholic
- **Height / Weight:** 5'5" / 180 lbs
- **Marital Status:** Married

KEY PROJECT ACCOMPLISHMENTS

Marketing Intelligence and Production Analytics Ecosystem | *Developer and Lead Designer*

- **System Background:** Created a high-speed, real-time analytics platform through a full-stack asynchronous architecture using Supabase PostgreSQL as the back-end database and Tailwind CSS as the front-end presentation layer.
- **Advanced ETL & Chunking Pipelines:** Programmatically created an ingestion engine to query, extract, and coordinate data, resulting in seamless integration of large datasets (60,000+ rows). Incorporated systematic date sequencing and parsing of timestamps for accurate time zone normalization across multiple cloud instances.
- **Dynamic Business Logic & Tiered Modeling:** Built custom multi-tier business logic calculation matrices into the front-end application. Developed dynamic live data models to segment specialized patient groups and calculate year-over-year (YoY) performance momentum automatically.
- **High-Quality Interactive Visualizations:** Rendered complex charts in Chart.js, including multi-series line matrices, trend charts, custom distribution areas, interactive time-slicing, and geographic diff-distro tables.

HMO Hub Monitoring and Billing Management System | *Database Designer and Developer*

- **System Background:** Developed a hospital-level financial tracking system connecting patient records to insurance verification and final ledger reconciliation.
- **Schema Constraints:** Created strict schema constraints on Supabase to manage relational tables tracking accounting data from initial case intake down to final billing settlement.

Data Privacy Note: To comply with the National Privacy Commission (DPA 2012) and protect proprietary corporate endpoints, underlying source code and live enterprise repositories are kept strictly private on GitHub. Full live demonstrations of staging environments, data structures, and SQL schemas are happily provided personally during the interview phase.
